

Benchback

**That old part on the shelf is money
your shop already paid.**

A voice agent for diesel shops to recover parts core deposits

A return is a chain of unfinished work

A core deposit comes back only after the old part meets the supplier's return terms.

The gap: bench evidence, return paperwork, and the final supplier credit.

One alternator. A complete demo chain

Fictional demo: Pine Ridge Diesel / Northline Parts

“The original box is gone.”

Benchback finds the approved alternate-container route and asks the technician to confirm completeness.

MATCH

WO-418 / INV-8042

PART

ALT-24-160 / \$240 deposit

DEADLINE

21 Sep 2026

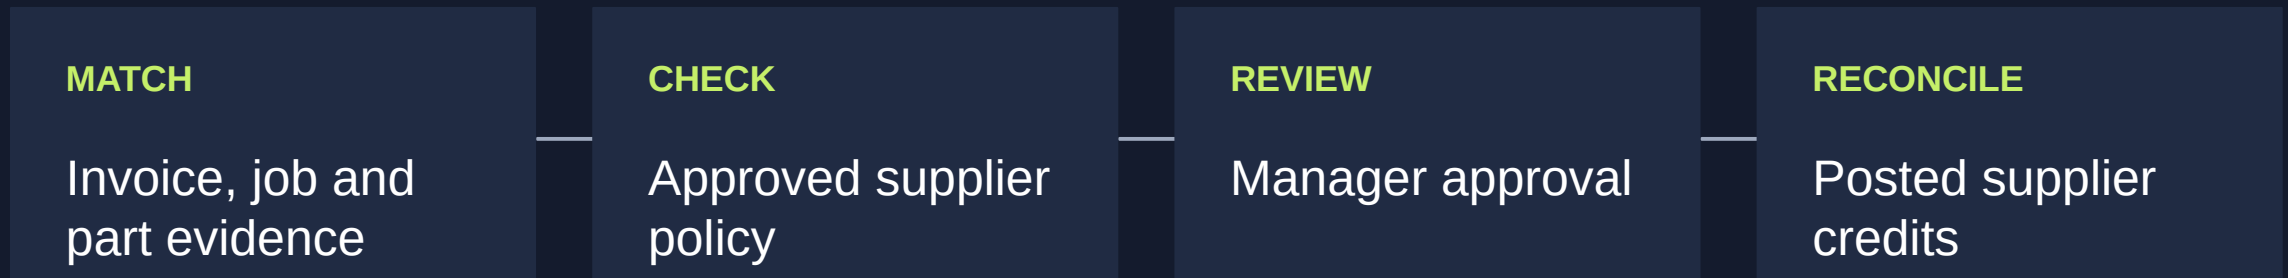

GATE

Confirm completeness, then manager review

Voice input. Explicit tool gates

AssemblyAI native Voice Agent API

Speech recognition + reasoning + speech output + tool calling

Tools use explicit records and approvals before changing a return's state.

The ledger closes when the credit arrives

Fictional demo ledger

\$240

Expected credit

Deposit on INV-8042

\$200

Credit received

CM-219

\$40

Open discrepancy

Await supplier resolution

CM-220 adds \$40. Total received: \$240. Discrepancy: \$0.

A workspace for the whole return

Bench technician

Voice inspection
Form fallback
Part and invoice evidence

Owner or parts manager

Return pack review
Dispatch record
Credit reconciliation

Account login and isolated workspace

Imports and exports / History / Policy configuration

A focused buyer and a testable price

Independent diesel repair shops

Buyer: owner or parts manager

\$99

per location / month

Proposed pricing

200 included voice minutes

\$15 provider voice cost

At \$0.075/minute. Excludes hosting, support and other operating costs.

The wedge is work at the bench

Fullbay already tracks parts cores

Benchback starts with a narrower job: a technician talking through an alternator or starter, then completing the return through actual credit.

Initial scope

Alternators + starters

Product hypothesis

Bench evidence + controlled returns

The next pilot measures credited dollars

A small pilot with independent diesel shops

1

Load real policies

Confirm supplier terms and evidence requirements.

2

Follow real returns

Measure approved packs, dispatches, and exceptions.

3

Reconcile real credits

Track received dollars and unresolved discrepancies.
