Technician observations

Original box missing. Complete assembly reported; approved container secured on pallet; invoice label attached.

Applicable return instructions

Return the matching, complete alternator or starter. Original packaging or the specified approved alternative is accepted. Keep the invoice reference with the core. The supplier inspects the returned unit and determines actual credit; the deposit is not a guarantee of acceptance. These are fictional demonstration terms.

Use a sturdy protective container secured on a pallet, with the invoice/core identification label attached. Confirm these sample terms with the actual supplier before a real shipment.

Pack this record with the labelled core. Arrange the actual return through your approved supplier process. This packet is not a carrier shipping label, supplier authorization or guarantee of credit.
